" A revolution which does not  
aim at changing me by changing relations  
between people does not interest me;  
what is more,  
I doubt whether a revolution which does not affect me  
enough to transform me  
is really a revolution at all.  
The Palestinian revolution has established new kinds of  
relations which have changed me.  
and in this sense the Palestinian revolution  
is my revolution. "
