## Think small!.....

# CHEMICAL ABSTRACTS on Microfilm

- If you would like to pack a lot into a small space, CHEMICAL ABSTRACTS on Microfilm will suit your needs. All 3.8 million abstracts published since 1907 are filmed on 16 mm microfilm to form a readily accessible file documenting 60 years of chemical progress.

- You can find abstracts quickly and easily, using a variety of microfilm reader-printer equipment. Abstracts may be photocopied at the touch of a button, eliminating the need to make handwritten notes. As a consequence users report a substantial time saving and increasing use of CHEMICAL ABSTRACTS.

1 Volume (26  
Issues) of

Good opportunity for young energetic person who wishes to join the growing community of health science librarians. Library located on campus of large State university in beautiful Piedmont country. Apply to: Dr. Wilhelm Moll, Director.

**LIBRARIAN/SYSTEMS ANALYST**. Opportunity to train for and perform a full range of library systems work in a rapidly expanding multi-million dollar university library system on manual, mechanized, and computer-based systems including on line fast response and time sharing applications involving information storage and retrieval and library administrative processes, e.g., management information, acquisitions, cataloging, circulation. The main university computer is an IBM 360/67. The University Library contains over 700,000 volumes, has a staff of over 280, and a book budget of more than \$1,300,000. *Where*: University of Alberta Library, Edmonton. *When*: Positions will be open April 1, 1968. *Type of appointment*: Academic status, tenure after two years of satisfactory service. *Salary*: \$9,000-10,450, \$400 annual increments. Appointment above the minimum salary level is possible, depending on education and experience. Benefits are comprehensive, and removal grants are provided. *Education and experience*: Bachelor's degree in a subject field, fifth-year degree in library science from an A.L.A. accredited school, 5 years of increasingly responsible experience in librarianship, with preference to persons experienced in technical services. *Responsibilities*: Upon completion of training, full responsibility for the analysis, design, and implementation of individual systems of the types mentioned above. Send complete résumé and the names of three references to Mr. N. W. Johnson, Co-ordinator, Systems Planning and Development, University Library, University of Alberta, Edmonton, Alberta, Canada.

**ASSISTANT LIBRARIAN**. Applications will be received for the position of Assistant Librarian in the B.C. Institute of Technology, Burnaby, B.C. The Institute, now entering its fourth year of operation, is situated in metropolitan Vancouver, B.C. Enrollment is expected to grow to 2,600 day students and 2,500 night students in 1968/69. A new Library building under construction and scheduled for completion in July 1968, is designed to house 500 students and over 50,000 volumes. Applicants must be graduates of an accredited Library School. Starting salary will depend on training and experience. Applications will be received up to April 1, 1968 by the Principal, B.C. Institute of Technology, 3700 Willingdon Avenue, Burnaby 2, B.C.

**HEAD SCIENCES LIBRARIAN**, Simon Fraser University Library. Applications are invited from candidates with a good university science degree, preferably in chemistry, physics or mathematics. Professional qualification in Librarianship is essential. At least ten years' experience in scientific work is required, some of which is at the supervisory level. Candidates must have appreciation of, and, ideally, some practical experience with, automated information retrieval systems. Automated circulation and acquisitions systems now operational. One month vacation; superior retirement, medical and other benefits. Salary \$12,000 to start. Transportation grant of \$1,000. Required between April 1 and August 1 1968. Apply to: University Librarian, Simon Fraser University Library, Burnaby 2, British Columbia, Canada.

SECOND (1968) EDITION—DIRECTORY OF  
SPECIAL LIBRARIES AND INFORMATION CENTERS

# READY NOW!!

Edited by Anthony T. Kruzas, Associate Professor  
of Library Science, University of Michigan

Three thousand new entries • Three hundred more pages • Four hundred  
new subjects • Nine new appendixes

Since publication in 1963 of the first edition of the **DIRECTORY OF SPECIAL LIBRARIES AND INFORMATION CENTERS**, specialized centers for the acquisition and organization of printed materials dealing with specific activities and interests have continued to grow in number and scope. The second edition of **DSLIC** represents an updated continuation of the standard guide to collections and personnel in U. S. and Canadian special libraries, information centers, documentation centers, and other similar units, sponsored by government agencies, business firms, trade associations, and professional societies, as well as major special collections in university and public libraries.

### *11,500 U. S. and Canadian Facilities Identified*

In this edition, detailed entries for 11,500 special libraries and information centers are arranged alphabetically by name of the supporting organization—the U. S. facilities in one section, the Canadian in another. The individual entries provide more than a dozen facts, including official name, address, and telephone number; name of sponsoring organization or institution; address, name, and title of the person in charge; and the names of other professional personnel.

### *2,500 Additional Units Given in Eighteen Appendixes*

Eighteen appendixes—nine more than in the first edition—contain 2,500 name and address listings, by state, for special information facilities not included in the main part of the volume. These include units such as U. S. Information Agency Libraries, U. S. Regional Libraries for the Blind, National Aeronautics and Space Administration Regional Dissemination Centers, and National Bureau of Standards National Standard Reference Data Centers.

### *Guide to Information on 2,000 Topics*

Collectively, the 13,000 specialized research libraries represent *the* prime sources of in-depth information concerning more than 2,000 subjects—some as general as electrical engineering and business administration, and many as specialized as the cattle industry, beryllium, and family planning.
