ARTS & HUMANITIES CITATION INDEX™

multidisciplinary current ■ easy to use

Now for the first time, you can search the journal literature of all the major arts and humanities disciplines with one, easy-to-use reference tool: the *Arts & Humanities Citation Index*.

This new multidisciplinary index covers about 1,000 of the world's most important journals in literature, history, languages, religion, philosophy, drama/theater, art, music and other related fields.

Each journal is indexed from cover to cover. This comprehensive indexing enables you to locate the types of items not usually found with conventional indexes — fiction, poetry, correspondence, book reviews — as well as articles.

And the *Arts & Humanities Citation Index* cuts to a minimum the lag time between an item's publication and its coverage by an indexing service. You can locate new articles within a few months of their appearance in the literature.

But the best part is there's no need to master specialized vocabularies or complex classification schemes to find what you want. Items are indexed by author, title words and by the references — or citations — that the authors themselves use to document their work. Indexing by citations lets you start a search with previously published material relevant to your subject and, through citation relationships, find more recent articles on the topic.

The variety of indexing techniques offered by the *Arts & Humanities Citation Index* makes it an extremely versatile tool. Whether you know a lot or a little about a subject ... an important author who has written on it or a few words likely to appear in a relevant title ... you can use the *Arts & Humanities Citation Index* to find quickly the information you want.
