ChernoLit™

[ЧерноЛит]

Chernobyl Bibliographic Search System

Battelle Software Products is proud to announce ChernoLit, an extensive bibliographic search system about the Chernobyl nuclear accident. ChernoLit contains 4,500 references and abstracts in an easy-to-use format and allows users to interactively search the bibliographic data through menu-driven software. With yearly updates you can be assured it is one of the most complete bibliographic sources for Chernobyl research.

The releases from Chernobyl and subsequent data collection present a resource for evaluating historical risk, transport and deposition models using extensive real-world data. Previously, these models were based on laboratory experiments, theoretical calculations, simulated accidents and limited real data.

ChernoLit is provided on high density floppy disks and is easily installed on an IBM PS/2, AT or fully IBM-compatible PCs.

The cost is \$395.00 each (U.S./Canada) and \$500.00 each (international). All titles and abstracts are written in English. To place an order please call 1-800-451-3543 or (614) 424-6393. For more information call (509) 375-6787.

All prices U.S. dollars only. Applicable sales tax for the following states: CA, CT, KS, MA, MD, MS, NY, OH, PA, SC, TN, TX, UT, VA, WA.
