THE PUBLIC AFFAIRS INFORMATION SERVICE BULLETIN

OUTSTANDING COVERAGE OF 20TH CENTURY
ECONOMICS, POLITICAL SCIENCE,
AND INTERNATIONAL RELATIONS

Unique among the major indexing services in the Social Sciences, PAIS offers selective coverage of the full spectrum of printed materials in its major fields of interest.

The fact that no type or format of publication is specifically excluded, results in the inclusion of English Language books, pamphlets, government publications (national, state, local and foreign), studies and reports by public and private institutions (including corporations), processed material, and, of course, a truly large selection of periodicals. Currently, PAIS indexes more than 1000 periodicals, as compared to 160 for *Readers Guide*, 262 for *The Social Science Index*, 260 for the *Humanities Index*, 156 for *Business Periodicals Index*, and 375 for the *British Humanities Index*. Many of the various types of publications indexed by PAIS include materials published in foreign countries which have been translated or otherwise made available in the English Language.

As for scope, the broad PAIS interpretation of "public affairs" over the years has proven increasingly important as more and more public problems cut across traditional disciplinary boundary lines. Such subjects as "energy" for instance, now fall under a variety of PAIS categories, including business and economics, politics and public administration, sociology, and even international relations. Subject searchers in the "energy" field would find this combination of full coverage in PAIS, but not in indexing services of more limited scope.

Selectivity criteria emphasize factual and statistical information, and still follow the philosophy of Charles Williamson, one of the PAIS founders who wrote in 1919 that "The PAIS is not, and should not attempt to be, a systematic index of a definite list of periodicals or other publications. It should aim to present only the best and most useful material, carefully selected from a wide range of sources, with a view to furnishing its subscribers, consisting mainly of general and special libraries, a guide in building up their collections and at the same time an index to their collections."

NO PREVIOUS MULTI-ANNUAL SUBJECT CUMULATIONS Until now, PAIS has offered no cumulations covering periods greater than one year. This has meant that in order to conduct exhaustive research on a topic, or even to locate a work whose date of publication was unknown, the reader has had to search year-to-year through large numbers of annual *Bulletins*.

COMPLETE RETROSPECTIVE SEARCHING IN ONE ALPHABET INSTEAD OF SIXTY This 60 year cumulative index, with its more than 1.2 million entries interfiled by subject into one alphabetical sequence, is contained in fifteen folio-size volumes, casebound to stand up under the heavy reference use they will receive.

The more widely used a particular reference tool, the greater the aggregate savings if and when non-productive search time can be cut down or eliminated. Therefore, considering the popularity and accepted reference use of the retrospective run of the *PAIS Bulletin* the savings resulting from the availability of its *Cumulative Subject Index* should be substantial.

Also, of course, both the dollar savings and the gains in research efficiency are benefits which will repeat themselves year after year—and will continue long after the one-time cost of this Subject Index has been forgotten. Actually, at the pre-publication price of \$1,075.00, the approximately 1.2 million interfiled subject entries are being offered at less than 90 cents per thousand.

THE COST EFFECTIVENESS OF CUMULATIVE INDEXES LeRoy Schwarzkopf, the well known documents librarian, explained the cost effectiveness of cumulations of long runs of periodical indexes in his review of the Carrollton's other 15 volume single-alphabet index, the 72 year Index to the *Monthly Catalog of U.S. Government Publications, 1900-1971*. In his two-page review, which appeared in the 1975 edition of *American Reference Book Annual*, he concluded by stating that although the price of the set may seem expensive, "... when judged by its value in practical use, in time saved for librarians and other users of federal documents, and in the more exhaustive searches which it allows and encourages, the set is quite inexpensive and is considered to be an outstanding bargain."

The most comprehensive English Language Index to the social sciences will now have a single source of subject access for its entire sixty year run . . .

THE
CUMULATIVE
SUBJECT INDEX
TO THE
P.A.I.S.
ANNUAL
BULLETIN 1915-1974

By special arrangement with the Public Affairs Information Service, Carrollton Press is adding the vital factor of *cumulative indexing* to the recognized reference value and unparalleled coverage of the PAIS Bulletin.

The combination should result in one of the largest and most effective subject reference systems ever produced in the social sciences.

For libraries not already holding complete runs of the *PAIS Annual Bulletin* we also offer the quality facsimile volumes produced by the Kraus Reprint Company. These cover the years 1915-1965 and are available for immediate delivery either as a set or as single volumes.
