

Rock Hall opens archives

The Rock and Roll Hall of Fame and Museum in Cleveland has opened its Library and Archives to the public, granting scholars, and fans alike access to the world's most comprehensive repository of written and audiovisual materials relating to the history of rock and roll. The Library and Archives houses a growing library collection that includes thousands of books, academic dis-

Rock and Roll Hall of Fame and Museum Library and Archives building in Cleveland.

sertations, periodicals, and sound and video recordings.

More than 230 archival collections are currently available for research, including the personal papers of performers, radio disc jockeys, photographers, journalists, critics, historians, poster artists, collectors, and fans. The strength of the archival collections currently lies in hundreds of boxes of music business records from record executives, artist managers, labels, historic venues, recording studios, and specialists in stage design and lighting. The collections also contain important individual items, such as personal letters penned by Aretha Franklin and Madonna, handwritten working lyrics by Jimi Hendrix and LL Cool J, and rare concert recordings from CBGB in the 1970s.

The state-of-the-art facility is housed in a new four-story, \$12 million building located on the Cuyahoga Community College Metro Campus in Cleveland, not far from

the museum. For more information on the Rock Hall's Library and Archives, visit <http://rockhall.com/library>.

HaithiTrust announces new board of governors

A new 12-member board of governors will lead HathiTrust, a partnership of major research institutions and libraries working to ensure cultural records are preserved and widely accessible in the digital age. The newly named board replaces the HathiTrust Executive Committee, established by the founding members in 2008. The new board oversees HathiTrust's 10-million volume digital preservation repository, research center, and other initiatives. The decision to create the board was made during the HathiTrust Constitutional Convention in October.

Board members elected at-large include:

- Five-year terms: Betsy Wilson (University of Washington) and Robert Wolven (Columbia University)
- Four-year terms: Richard Clement (Utah State University) and Patricia Steele (University of Maryland)
- Three-year terms: Carol Mandel (New York University) and Sarah Michalak (University of North Carolina-Chapel Hill)

The six other members, who were appointed by the founding institutions, will serve a five-year term. They include: Paul Courant (University of Michigan), Carol Diedrichs (Ohio State University), Laine Farley (California Digital Library), Wendy Lougee (University of Minnesota), Brian Schottlaender (University of California-San Diego), and Bradley Wheeler (Indiana University).

For more information, visit www.HathiTrust.org.

Environments for Student Growth and Development

ACRL announces the publication of *Environments for Student Growth and Development: Libraries and Student Affairs in Collaboration*, edited by Lisa Janicke Hinchliffe and Melissa Autumn Wong.

Environments for Student Growth and Development focuses on collaborations between campus student services and libraries. Librarians and student affairs professionals share a commitment to student success and holistic development, collaborative strategies, and reflective practice.

The book explores how librarians and student affairs professionals partner through programming and other activities in order to create stronger campus environments for student learning, growth, and development.

This lively study of campus collaboration features an introduction to student affairs and student development by Hinchliffe

and Wong, followed by 14 case studies of successful collaborations coauthored by student affairs and library professionals.

Also included is a bibliography of selected publications on student affairs and strategies for library and student affairs collaborations. *Environments for Student Growth and Development* is essential reading for library administrators, librarians involved in outreach and programming, student services professionals, and library school collections.

Environments for Student Growth and Development is available for purchase in print, as an e-book, and as a print/e-book bundle through the ALA Online Store; in print

and for Kindle through Amazon.com; and by telephone order at (866) 746-7252 in the United States or (770) 442-8633 for international customers.

Chronopolis named trustworthy digital repository

The Center for Research Libraries (CRL) has certified Chronopolis, a large-scale data preservation network, as a “trustworthy digital repository” that meets accepted best practices in the management of digital repositories. Chronopolis is led by the University of California (UC)-San Diego Libraries and the San Diego Supercomputer Center (SDSC) at UC-San Diego, with partners at the National Center for Atmospheric Research and the University of Maryland’s Institute for Advanced Computer Studies.

The primary metrics used by CRL in its assessment are those included in the Trustworthy Repositories Audit and Certification (TRAC) checklist developed by a joint task force of the Research Libraries Group and the National Archives and Records Administration in 2003, to define criteria for evaluating digital repositories.

“TRAC certification is the ‘Good Housekeeping Seal of Approval’ in the digital preservation community,” said Brian E. C. Schottlaender, Chronopolis principal investigator and UC-San Diego’s Audrey Geisel University Librarian. “It conveys, formally, that Chronopolis is mission-ready. We are very pleased to join our colleagues at Portico and the HathiTrust in having received this trusted designation.”

Chronopolis, which was launched in 2008 as one of the Library of Congress’ efforts to collect and preserve at-risk digital information, has the capacity to preserve hundreds of terabytes of digital data of any type or size, with minimal requirements of data providers. The project leverages high-speed networks, mass-scale storage capabilities, the expertise of partners to provide a geographically distributed, heterogeneous, and highly redundant archive system.

Chronopolis also serves as the data preservation repository for UC-San Diego’s campus-

wide Research Cyberinfrastructure Initiative, which provides researchers with the computing, network, and human infrastructure needed to store, manage, and share data.

Vanderbilt Central Library earns gold for green renovation

Vanderbilt University's Central Library has been awarded gold certification for its environmentally friendly 2010 renovation from the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) Green Building Rating System. The recognition makes the Central Library the first Vanderbilt campus renovation to achieve this high honor. Vanderbilt University has a total of 12 LEED-certified buildings.

"We are thrilled that the renovation exceeded our initial sustainability goals and the recognition speaks to the dedication and commitment of the entire planning team," said Connie Vinita Dowell, dean of libraries at Vanderbilt.

As part of its LEED-Gold certification, the renovation achieved credits for installation of 30 percent more efficient lights, installation of an Encelium lighting control system, enhanced use of natural lighting and daylight harvesting, recycling of 75 to 80 percent of demolition waste, place-

ment of recycling containers in 25 locations throughout the building, installation of high-efficiency variable flow refrigerant HVAC mechanical system, and recycled content in 10 percent of the new furniture and furnishings.

Credits were also given for the library's "community connectivity" as the building is located within one-half mile of a residential area and ten basic services. In addition, there are two bus routes within one-quarter mile of the building.

The LEED Green Building Rating System is the nationally recognized benchmark for the design, construction, and operation of high-performance green buildings. LEED certification signifies that a building is environmentally responsible and a healthy place to live and work.

Dominican University GSLIS introduces master's of professional studies degree

The Dominican University Graduate School of Library and Information Science (GSLIS) has opened applications for a new master's degree of professional studies in library and information science (MPS), and expects to enroll the first students in the program in fall 2012. The purpose of the new MPS degree is to provide

New ACRL Discussion Groups

ACRL announces the establishment of four new discussion groups, approved by the ACRL Board of Directors during the 2012 fiscal year. The new discussion groups and their charges are as follows:

The Digital Humanities Discussion Group provides a venue for ACRL members to meet and share ideas related to Digital Humanities and the role of librarians in this emerging discipline.

The International Perspectives on Academic and Research Libraries Discussion Group serves to promote awareness and discussion of the international, transnational, and global dimensions of issues critical to the future of academic and research libraries, to promote comparative study of academic library trends, issues, and

operations, and to promote collaboration between academic and research librarians on issues benefitting from an international perspective.

The Leadership Discussion Group provides a forum for conversation, communication and collaboration about leadership and management issues important to academic librarians.

The Student Retention Discussion Group serves as a forum to discuss methods, best practices, and assessment for developing case-by-case and programmatic efforts related to student retention.

Complete details on ACRL discussion groups are available at www.ala.org/acrl/aboutacrl/directoryofleadership/discussiongroups/dgs.

library, information, archival and related professionals with the opportunity to deepen their knowledge in particular areas of specialized study, and/or undertake broader-based study in areas of interest that may cross disciplinary boundaries. The MPS degree enhances opportunities for holders of post-MLIS certificates to build upon these to earn a second professional degree.

The MPS degree is particularly relevant as a second professional degree for holders of ALA-accredited master's degrees and holders of specialized information degrees, certificated school librarians, and archivists educated in other programs.

For more information, visit www.dom.edu/gslis/programs/mps.

EBSCO Medline Complete

EBSCO recently announced the release of MEDLINE Complete, a full-text companion to the MEDLINE index providing full text for more than 1,850 journals. The database contains full text for many of the most used journals in the MEDLINE index—available in MEDLINE Complete with no embargo.

MEDLINE Complete provides journal coverage of medicine, nursing, dentistry, veterinary medicine, the health care system, and pre-clinical sciences as well as many other areas. Coverage dates back to 1857 and full-text back to 1865.

Users of MEDLINE Complete can also access the resource through EBSCO's mobile interface. All databases available through EBSCOhost are available through one or more mobile applications that are supported by most mobile devices. For more information, visit the EBSCO Web site at www.ebscohost.com.

RIPM index and online archive now available from HARRASSOWITZ

HARRASSOWITZ and RIPM, the Retrospective Index to Music Periodicals, recently announced that both the RIPM Retrospective Index to Music Periodicals

Hot on the Web

The following are the top five most read articles on the online version of our sister publication *College & Research Libraries* in 2011.

1. "The Academic Library Impact on Student Persistence" by Mark Emmons and Frances C. Wilkinson (March 2011)

2. "Measurement of Use of Electronic Resources: Advances in Use Statistics and Innovations in Resource Functionality" by Deborah D. Blecic, Joan B. Fiscella, and Stephen E. Wiberley (January 2007)

3. "Perceptions and Practices of Learning Styles in Library Instruction" by Connie Dalrymple (May 2002)

4. "Distinctive Signifiers of Excellence': Library Services and the Future of the Academic Library" by Scott Walter (January 2011)

5. "Reframing Information Literacy as a Metaliteracy" by Thomas P. Mackey and Trudi E. Jacobson (January 2011)

Visit *C&RL* online at crl.acrl.org to articles and preprints, and to subscribe to content alerts.

and the RIPM Online Archive of Music Periodicals are now available through the RIPMPlus platform.

Founded in 1980, the Retrospective Index to Music Periodicals is an annotated international database established to provide detailed content analyses of 18th-, 19th-, and 20th century writings on musical history and culture. RIPM currently indexes the contents of 184 music periodicals from 1766 to 1962, including articles, reviews, illustrations, music examples, advertisements, and press reviews. It provides access to primary source material and is an essential complement to RILM, the Music Index, and the New Grove Dictionary of Music and Musicians.

The RIPM Online Archive is a full-text collection of journals indexed in the RIPM Retrospective Index. The online archive consists of 105 rare music journals that are unique, not available in any library, and are culled together from a number of incomplete copies in different collections to form complete journal runs.

Both the RIPM Index and the RIPM Archive are updated twice a year with new titles, and both are accessed on the new RIPMPlus platform. *~*
