

College and University Library Statistics

FOR SEVERAL YEARS the February issue of the *A.L.A. Bulletin* has carried the statistics of college, university, and teachers college libraries. These statistics have been collected by the American Library Association Statistical Assistant and have been of much interest and value to librarians. Confronted by the necessity of retrenchment, the A.L.A. Executive Board decided to relieve the Headquarters staff of the necessity of compiling and publishing the statistics and to encourage the A.C.R.L. and its official organ, *College and Research Libraries*, to assume this responsibility. That was in October. Officers of the A.C.R.L. and the editors set to work promptly to work out a plan whereby the continuity of the statistics could be maintained.

With the reduction in the activities of the A.L.A. Statistical Assistant, it was necessary to seek volunteer assistance in preparing the material for publication. Julia Wright Merrill, chief of the A.L.A. Department of Information and Advisory Services, has aided greatly in the preparation and routing of material. The statistics for college and university libraries (Group I) were prepared and tabulated by Lucille Mock, loan department, Iowa State College Library, under the direction of Charles H. Brown, librarian. The statistics for college and university libraries (Group II) were prepared by G. Flint Purdy, librarian, Wayne University, Detroit. The statistics for teacher-training institutions were prepared by Clara Guth-

rie, reference librarian, Milner Library, Illinois State Normal University, and the staff of the Milner Library, of which Eleanor Weir Welch is librarian. All of these persons have very graciously accepted their share of the responsibility for getting the job done efficiently and, it must be added, on rather short notice.

Because of the need for economy several items formerly included have been omitted from the statistics of the larger college and university libraries (Group I): number of staff members on central library budget; salaries of administrative office assistants; salary scales for specific departments, catalog, circulation, etc.; and student service rates. School and college libraries on central library budget and departmental libraries on central library budget have been combined into one array of figures.

The items included for the small college and university libraries (Group II) and the teacher-training institutions are the same as those for the statistics of 1940-41.

As is the case each year the list of institutions included varies from the list of previous years. Despite the various efforts that have been made in the past to continue the same libraries, some institutions failed to report and others reported too late. The variation this year is perhaps slightly greater, due no doubt to the effect of the war. To those libraries which have cooperated in spite of difficulties, *College and Research Libraries* extends thanks on behalf of all those who will use the statistics.
