ERRATUM

MODAFFERI, R.D. 1992. *In utero* pregnancy rate, twinning rate and fetus production for age-groups of cow moose in south-central Alaska. Alces 28:223-234.

Captions for Fig. 2 (p.226) and Fig. 3 (p.228) were reversed and should be as follows:

Fig. 2. Model estimated parameter coefficients (circles) and coefficient ±95% CIs (vertical lines) from the model, logit = α + t_j, consisting of the logit = (ln(pregnant/non-pregnant)), a = mean logit (α_j) and age-group effects (τ_j, n =4). Mean logit, α = 1.4926.
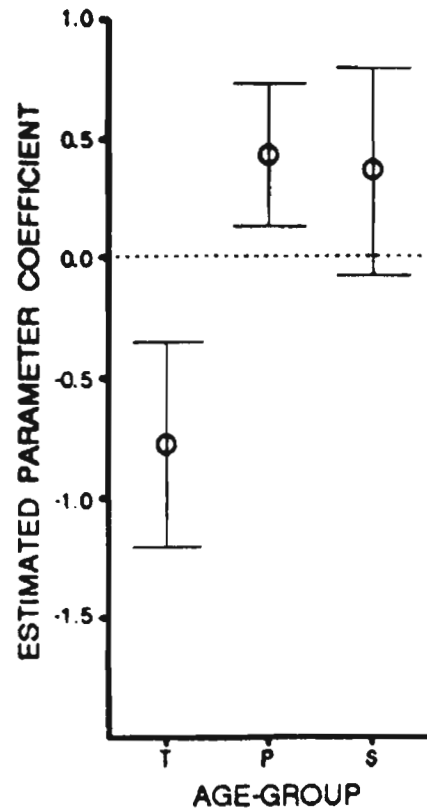

Fig. 3. Model estimated parameter coefficients (circles) and coefficient ±95% CIs (vertical lines) from the model, logit = α + β_i + τ_j, consisting of the logit (ln(2-fetus pregnancies/1-fetus pregnancies)), a mean logit (α), year/area effects (β_i, n = 11), and age-group effects (τ_j, n = 3). Mean logit, α = -1.4362.
