

Subject Index: CIT Vol. 10 (2002), N° 1–4

- Adaptive applications, 151
- Adaptive Knowledge Base Builder, 181
- Adaptive user interfaces, 181
- Approximative optimal algorithm, 189
- Aspect-oriented, 133
- Audit, 219
- Cellular automata, 251
- Certificates, 241
- Classroom LAN, 93
- Clinical trials, 233
- Commonality, 133
- Compiler tools, 55
- Computerized educational systems, 181
- Constraints, 1
- Continuous speech recognition, 295
- Control systems, 115
- Conversion, 69
- Crop-producing greenhouse, 195
- Crossover design, 233
- Database, 241
- Deterministic single machine, 211
- Development methodology, 225
- Dialog management, 295
- Dial-up Internet access, 93
- Direct control, 195
- Distributed systems, 203
- Domain engineering, 1
- Domain-specific language, 37
- Domain-specific languages, 55
- Domain-specific processor, 37
- Dynamic programming, 189
- Dynamic systems, 195
- E-business, 241
- E-commerce, 241
- E-commerce systems, 303
- E-Deposit, 241
- Embedded systems, 115
- Empirical evaluation, 103
- Encryption, 241
- Epilepsy, 103
- Equivalence testing, 233
- E-university, 241
- Evaluation, 103
- Evolutionary algorithm, 211
- Evolutionary algorithms, 195
- Features, 283
- Functional document model, 19
- Functional programming, 19
- Fuzzy numbers, 261
- Fuzzy temporal knowledge, 163
- Fuzzy temporal relations, 163
- Fxgrep, 19
- Fxt, 19
- Generative, 133
- Graph, 189
- Groupware, 151
- Heterogeneous computing, 85, 151
- Heuristic algorithm, 85
- Heuristics, 251
- Index compression, 157
- Information systems, 225
- Intelligent systems, 303
- Intelligent tutoring systems, 181
- Intentional programming, 133
- Inverse kinematics, 125
- Inverted file, 157
- ISRQCC, 219
- Kinematic analysis, 125
- Kinematic redundancy, 125
- Language prototyping, 37
- Large-scale, 133
- Leda, 133
- Lexicon compression, 157
- Linguistic analysis, 295
- Linguistic variables, 261
- Maintenance, 219
- Manufacturing information systems (MIS), 303
- Metaparadigm, 133
- Modeling, 251
- Monitoring, 219
- Multidimensional database, 69
- Multidimensional schema, 69
- Multi-paradigm, 133
- Multi-platform support, 171
- Multistage classification, 283
- Necessity and possibility measures, 163
- Networking, 115
- Nonparametric tests, 233
- Optimisation, 189
- Optimization, 85
- Parallel computing, 203
- PKI, 241
- Programming, 133
- Rapid prototyping, 37
- Real-time, 115
- (Re)design, 219
- Redundant robots, 125
- Reengineering, 219
- Rejection, 283
- Relational database, 69
- Relational schema, 69
- Risk, 219
- SAS application, 233
- Scheduling, 203, 211
- Self-motion curves, 125
- Similarity based reasoning, 261
- Simulation, 203
- Small-scale paradigm, 133
- SML, 19
- SMTP server, 93
- Software agents, 303

- Software design, 55
- Software development, 133
- Software frameworks, 151
- Software product lines, 1
- Speech synthesis, 295
- Spoken dialog system, 295
- SSL, 241
- Statistical, 283
- Stochastic optimization, 251
- Strategic planning, 225
- Structural, 283
- SUIF compiler system, 37

- Task scheduling, 85
- TCP/IP router, 93
- Text compression, 157
- Tolerance spaces, 261
- Tool support, 1
- TOST, 233

- UML, 1
- User interface adaptation, 171
- User interface specification, 181

- Variability analysis, 133
- Vertex guarding, 189
- Visualization, 103

- Workflow management systems and technologies, 303

- XML, 241
- XML pattern matching with regular expressions, 19
- XML transformations, 19
- XSLT, 19
