

the entry on bookbinding itself. Since famous binders are included, other entries are biographic. Time references are often vague, such as *originally*, *formerly*, and *today*. Tabular information is in decimals; quantification data in the definitions are often in fractions. Lexical data are absent.

Despite such shortcomings from any one specialist perspective, this volume deserves proper credit for pulling together

and synthesizing myriad data from diverse sources, offering convenience for general reference, and a pleasing presentation in legible 9 point Times Roman on quality paper, in a durable, practical binding. Every binder, bibliographer, conservator, and reference librarian will have occasion to use this tool; it is an important contribution.—*Lawrence J. McCrank, Indiana State University.*

LIBRARY HI TECH is taking off!

Reviews & Comments

"Library Hi Tech's inaugural issue (Summer 1983) shows excellent promise."

—Information Retrieval & Library Automation, 7/83

"Under the expert guidance of Nancy Melin, here are 120 illustrated pages which deliver what the editor claims....What makes the articles particularly useful is the inclusion of bibliographies, often annotated....It's hard to think of another journal with such wide coverage, such good writing, and such common sense advice for the less than expert who is involved with the new technologies. Highly recommended."

—Bill Katz, Editor of Magazines for Libraries

"Congratulations on your Summer, first issue....I learned a lot from the feature articles, largely because most of them were written in language I can understand. They were nearly all helpful to me and encouraged me to mark their bibliographies for further reading....Articles like these — sensible, practical pieces based on actual experience —... most of us need just this at this stage of facing the computer."

—Lee Ash, Library Consultant

"Library Hi Tech's first issue was great. I read it straight through and was exhausted by all I need to keep aware of. Keep it up. The profession needs it."

—Sharon Bonk, Acting Head, Technical Services
State University of New York at Albany

PLAIN AND SIMPLE

Our physical size and financial strength — necessary to make and honor commitments — indicate the successful working relationships we have with thousands of libraries worldwide.

But the plain truth is, simply, that it is our sensitivity to your unique requirements, and our flexibility in providing an exhaustive and relentless effort for total customer service that is our real strength.

We want to work with you — to help you provide exceptional patron service, which is your strength.

We can help. Write today — P.O. Box 1943, Birmingham, AL 35201 (205) 991-6600
