Library of Congress bicentennial

The Library of Congress (LC) celebrated its 200th birthday on April 24. With collections totaling almost 119 million items, LC is the "largest library in the world." ("Fascinating Facts about the Library of Congress," *The Library Today*. <http://www.loc.gov/today/fascinate.html>. 25 Apr. 2000)

Internet vs. libraries

A survey of 1,014 households commissioned by the Round Table Group, a consortium of university professors in Chicago, "found that 67 percent of Americans ages 18 to 24 live in households that use the Internet to gather key information . . . 84 percent of 18 to 24-year-old Internet users say that their household is more likely to use the Internet to retrieve useful information than they are to go to the public library."

("America's Young Adults Turn to Net," *Cyber Atlas*. http://cyberatlas.internet.com/big_picture/demographics/article/0,1323,5901_339721,00.html. Apr. 25, 2000)

Benchmarks for distance education

A recent study by the Institute for Higher Education Policy resulted in "a list of 24 benchmarks that are essential to ensure quality in Internet-based distance education." Several of the benchmarks are directly related to libraries.

(The Institute for Higher Education Policy, "Quality On The Line: Benchmarks for Success in Internet-Based Distance Education." <http://www.ihep.com/quality.pdf>. Apr. 25, 2000)

2,500 public domain e-texts

Project Gutenberg (<http://www.gutenberg.net/>), founded by Michael Hart in 1971, will post 2,500 public domain e-texts this year. Gutenberg's more than 1,000 volunteers may select any title published before 1922 to add to the list. Hart is seeking funding to add another 7,500 titles before the project's 30th anniversary next year.

(Sam Weller, "Project Gutenberg sets 10,000 book goal," *Publishers Weekly*, Apr. 3, 2000: 42)

Library graduates pursue nontraditional jobs

Most graduates from the University of Michigan's School of Information, formerly the library school, will be looking for jobs as information architects and intelligence managers rather than as librarians. "While some of Michigan's recent graduates still pursue traditional library jobs, the numbers who do so are shrinking—down from 58 percent in 1997 to about 33 percent last year, according to estimates."

(Katherine S. Mangan, "In revamped library schools, information trumps books," *Chronicle of Higher Education*, Apr. 7, 2000: A43-A44)

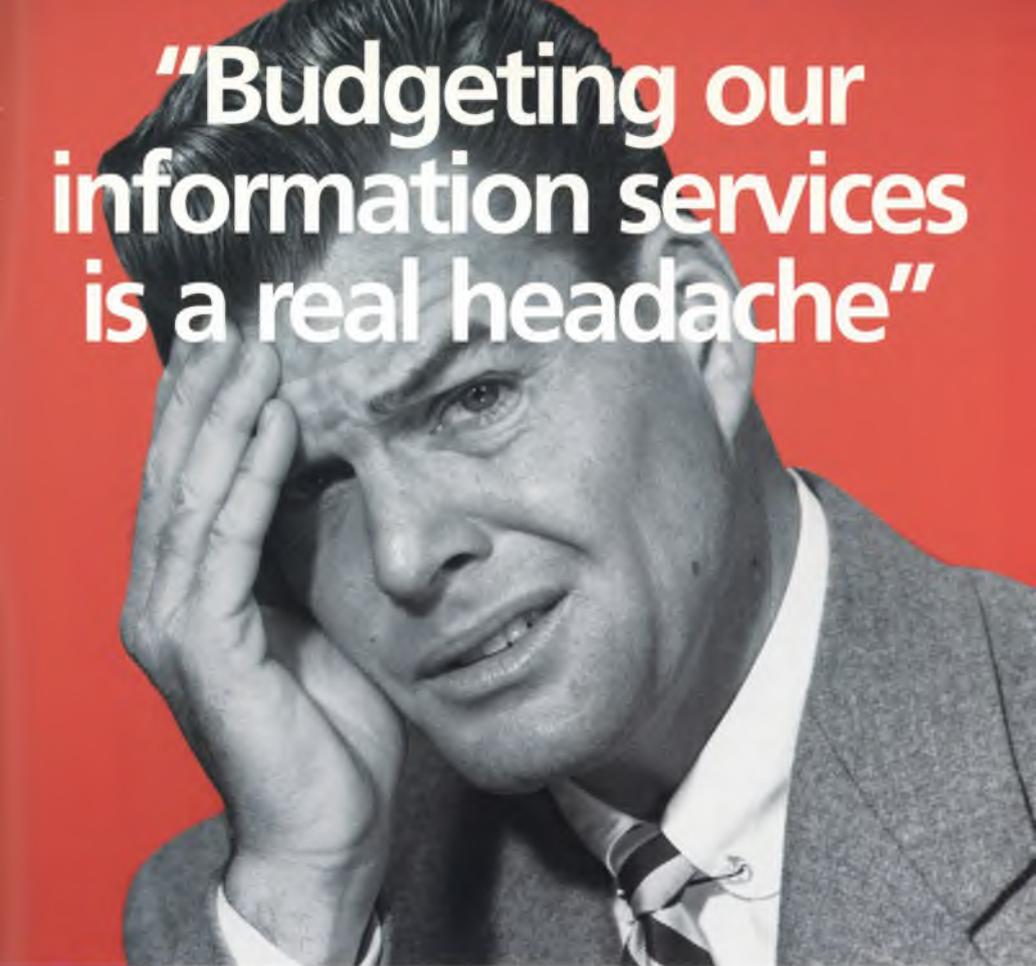

Accredited "library" schools

Nine out of the 56 master's programs currently accredited by the ALA do not have the word *library* in their names: University of California/Los Angeles, Florida State University, University of Michigan, University of Missouri-Columbia, Syracuse University, University at Albany/State University of New York, Drexel University, University of Pittsburgh, and University of Tennessee.

("Directory of Institutions Offering Accredited Master's Programs," *American Library Association*. <http://www.ala.org/alaorg/oa/progindx.html>. Apr. 25, 2000)

Thanks to Mike Hanson, reference librarian at Western Wisconsin Technical College, for his contributions and suggestions.

Ann Viles is coordinator of reference and instruction at Appalachian State University in Boone, North Carolina, e-mail: vilesea@conrad.appstate.edu

"Budgeting our information services is a real headache"

(not any more!)

You already know The Dialog Corporation is a world leader in the distribution of information databases. What you might not know, is that "pay as you go" isn't the only way you can subscribe to our service.

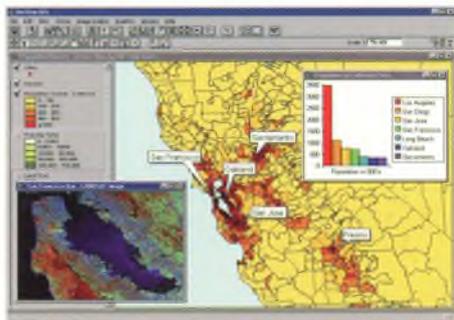

To help your budgeting you can now choose a range of database titles on a "fixed-cost, unlimited access" basis. One payment secures 24 hour, 365 day usage with no other charges. Load the database onto your intranet, or access it on the Internet via one of 20 extranet servers.

Whichever way it's delivered, you'll get the advantage of @Site software which allows you to access the database via your favourite browser, and GOLD eDOCS which lets you move from an abstract record to a full text article in seconds.

For more information on our fixed-cost, unlimited access services, contact The Dialog Corporation's OnDisc/@Site Division on +44 (0)1993 899300 (email: ondisc@dialog.com) or your local reseller.

If a Picture is Worth a Thousand Words, a Map Must be Worth a Million

Libraries are the campus nerve center, tying all departments and disciplines together by their common need for information. As a clearinghouse for all kinds of information, libraries need to provide tools that make information easy to access and understand. One of these is a geographic information system (GIS). A GIS turns ordinary databases into interactive maps and provides tools to query those databases in ways not possible with traditional spreadsheets. A GIS is useful to students and researchers in any discipline from agriculture to zoology. Providing a GIS workstation at the library makes these tools available to the entire campus community, not just one or two departments.

ESRI offers a range of GIS packages for libraries, from ArcView® GIS to the Spatial Database Engine™ (SDE™)—client/server software for managing large spatial databases. For more information about ESRI® GIS solutions, call us today.
