

from the editors

Although we may have "theme" issues in the future, the fact that the three papers, by Michael Schmidt, S. Morris Engel and Gary Jason, and Michael Schmidt's bibliography in this issue are about fallacies is a matter of happy happenstance, not design. E.P. Brandon's paper on ellipsis is therefore as much at home here as the

others.

We draw your attention to Schmidt's excellent bibliography and to his request for information about items he has overlooked. Is one of your favorites not included? Worse yet, is one of your papers missing? Please send additions and corrections to Michael Schmidt, directly or through this journal. □

IN MEMORIAM

It is with great sadness that the editors have learned of the death of Professor Merrill Hintikka on January 1, 1987, after a short illness. Her vitality, wit and good judgement will all be sorely missed by those who had the privilege of knowing her. We are grateful for the support she gave to informal logic by serving on the editorial board of this journal.

We extend our heartfelt condolences to her husband, Professor Jaakko Hintikka.
