

Dear Prof. Mohammad Moin

Assalamo Alaikum

Thank you for sending me the 36th and 37th, 2021 volumes of PJO. I went through both volumes with a lot of interest and enjoyed reading every article.

Both volumes have generously covered the diagnostic, therapeutic, and interventional aspects of current ophthalmology. I took great pleasure in reading your article on Medical Education and Tayyaba Gul's article on Artificial Intelligence.

All the OTHER articles met international standards in terms of contents, style, language, and grammar.

I was delighted to see that ophthalmologists from abroad have started sending you articles for publication in your esteemed journal.

The credit for achieving such a high standard goes to you and your dedicated team.

I know you have spent many long hours of your precious time to achieve your ultimate goal,

"achieving the highest possible standard for Pakistan Journal of Ophthalmology."

I take great pleasure in congratulating you and your team for achieving such a noble goal.

With Profound Regards

Professor Mohammad Daud Khan

Founder Vice Chancellor

Khyber Medical University
